Analysis Studio User Guide - Illinois Institute of Technology

When an analysis is imported into Report Studio, the report contains one query which processes all the sets found on the crosstab. Each set is defined by 18 data items that segment and summarize the base set definition. To maintain reports converted from Analysis Studio in Report Studio, you should understand what each of these items represents and how they relate to each other. For more information, see the Report Studio User Guide. Analysis results can be shared in the following ways: as ...
