The BMW N54 engine featured in the 135i, 335i, and 535i is one of the most tune-able engines ever. Some people call it the '2JZ' of German engines, but we think the N54 is on a whole new level. The N54 engine has forged internals, meaning it can handle an immense amount of power without requiring any expensive engine modifications.

BMW's N54 was the first mass production turbocharged gasoline engine produced by BMW in decades. Looking at BMW's current line-up in 2017, which is mostly turbocharged, I believe it is fair to say the N54 was in many ways an "experiment". The N54 was notorious for its common and troubling issues early on.
