Chapter 12 Eye 10th ed**Chapter 12 The Lymphatic System**

The lymphatic system consists of the lymphatic vessels, lymph nodes, and certain other lymphoid organs in the body (Figure 12.1). Extremely porous blind-ended lymphatic capillaries pick up excess tissue fluid leaked from the blood capillaries (Figure 12.2). The fluid (lymph) flows into the larger lymphatics and finally into the blood vascular system through the right lymphatic duct and the left thoracic duct.

Chapter 12: Lymphatic System

Chapter 12: The Lymphatic System. STUDY. PLAY. vessels,fluids. lymphatic system consists of 2 semi-independent parts: 1)lymphatic ____ and 2)lymphatic tissues & organs. Lymphatic system functions: transports escaped ____ back to blood, plays essential roles in body defense and disease resistance.

Chapter 12: The Lymphatic System Flashcards | Quizlet

Lymphatic System Organ system that consists of two semi-independent parts; lymphatic vessels and lymphoid tissues and organs.

Chapter 12 --> The Lymphatic System Flashcards | Quizlet

Chapter 12 Lymphatic System Notes Consists of two semi-independent parts: o Lymphatic vessels o Lymphoid tissues and organ Lymphatic system functions o Transports escaped fluids from the cardiovascular system back to the blood- vessels o Plays essential roles in body defenses and resistance to disease- tissues and organs Lymphatic vessels: o Lymph consists of excess tissue fluid and plasma proteins carried by lymphatic vessels o If fluids are not picked up edema occurs as fluid accumulates ...

Learn chapter 12 lymphatic system with free interactive flashcards. Choose from 500 different sets of chapter 12 lymphatic system flashcards on Quizlet.

chapter 12 lymphatic system Flashcards and Study Sets ...

lymphatic system functions complex drainage system–interstitial fluid carried through, empties into veins and becomes part of blood plasma transports lipids and lipid-soluble vitamins (A,D,E,K) from digestive tract to blood– lymphatic system slows their entry into blood and allows even dispersion throughout body

Chapter 12: Lymphatic System Flashcards | Quizlet

The lymphatic system. A body system consisting of lymph, lymphatic vessels, and lymphatic tissue and organs. The lymphatic system helps return intestinal fluid to the blood, transports the products of fat digestion from the digestive system to the blood, and assists in body defenses.

Lymphatic System - Chapter 12: The Cardiovascular System ...

Lymphatic System: Not all blood plasma that leaks out of the capillaries to nurture body tissues is returned to the blood on the venule side of the capillary bed. In order to maintain the blood volume, however, that lost fluid must be returned somehow. One primary function of the lymphatic system is to return that fluid to the blood.

Chapter 12: The Lymphatic System Flashcards - Cram.com

The lymphatic system, for most people, is associated with the immune system to such a degree that the two systems are virtually indistinguishable. The lymphatic system is the system of vessels, cells, and organs that carries excess fluids to the bloodstream and filters pathogens from the blood. The swelling of lymph nodes during an infection and the transport of lymphocytes via the lymphatic vessels are but two examples of the many connections between these critical organ systems.

21.1 Anatomy of the Lymphatic and Immune Systems

10.Name the various types of lymphatic cells and discuss their basic functions 11.Explain the difference between red and white pulp of the spleen 12. Define MALT and name the organs apart of MALT Learning Objectives: Chapter 21: The Immune System: Innate and Adaptive Body Defenses 13.What does immunity mean? 14.Distinguish and explain the difference between innate and adaptive defenses 15.
