In questo taccuino puoi modellare la tua vita come vuoi che sia. Lascia che i tuoi pensieri corrano liberi e disegnare ogni volta che vuoi. Dettagli: 100 pagine bianche, 15,24 x 22,86cm.

The great Renaissance artist Andrea del Sarto (1486 – 1530) rivals Leonardo da Vinci as one of history's most accomplished draftsmen. Moving beyond the graceful elegance of his contemporaries, such as Raphael and Fra Bartolommeo, he brought unprecedented realism to his drawings through the rough and rustic use of chalk in his powerfully rendered life and compositional studies. With an immediacy few other Renaissance artists possess, del Sarto's work has proven to be inspirational and compelling to later audiences, with admirers such as Degas and Redon. This lavishly illustrated book reveals del Sarto's dazzling inventiveness and creative process, presenting fifty core drawings on paper together with a handful of paintings. The first publication to look to del Sarto's working practice through a close examination of his art from across all the world's major collections, this volume analyzes new studies of his panel underdrawings as well. The depth and breadth of its research make this book an important contribution to the study of del Sarto and Florentine Renaissance workshop practice. This volume is published to accompany an exhibition on view at the J. Paul Getty Museum from June 23 through September 13, 2015, and at the Frick Collection in New York from October 6, 2015, through January 10, 2016.

Rarely seen drawings by 64 masters, including Braque, Cézanne, Degas, Gauguin, Hugo, Klee, Manet, Matisse, Modigliani, Mondrian, Monet, Munch, Picasso, Renoir, Rodin, Rubens, Seurat, Toulouse-Lautrec, van Gogh and Watteau, are reproduced in this exceptional collection. Victor Chan provides a full biographical sketch of the individual masters and discusses their art.

In those years, Europe was full of bonfires committed to make a clean sweep of witches. At the same time a young scientist: Sybilla Merian, daughter of the well-known German engraver Matthaeus Merian, was instead committed to studying, and illustrating the microscopic world of insects, caterpillars and butterflies and the little bigger world of flowers, plants and animals. The wonderful metamorphosis of caterpillars was the basis of her best work: Metamorphosis Insectorum Surinamensium, published in Amsterdam in 1705. The work carried out by Sibylla Merian is fantastic. Indeed, during that time, it was unusual to deal with insects - the beasts of Satan. Her drawings of plants, snakes, spiders, iguanas and tropical beetles are still considered masterpieces and are sought-after by collectors around the world. Another great master, the English entomologist Moses Harris, contributed to complete the volume with his interesting engravings.

1777. Albany, New York. As battle cries of the American Revolution echo in the distance, servants flutter about preparing for one of New York society's biggest events: the Schuylers' grand ball. Descended from two of the oldest and most distinguished bloodlines in New York, the Schuylers are proud to be one of their fledgling country's founding families, and even prouder still of their three daughters - Angelica, with her razor-sharp wit; Peggy, with her dazzling looks, and Eliza, whose beauty and charm rival those of both her sisters, though she'd rather be aiding the colonists' cause than dressing up for some silly ball. Still, Eliza can barely contain her excitement when she hears of the arrival of one Alexander Hamilton, a mysterious, rakish young colonel and General George Washington's right-hand man. Though Alex has arrived as the bearer of bad news for the Schuylers, he can't believe his luck - as an orphan, and a bastard one at that - to be in such esteemed company. And when Alex and Eliza meet that fateful night, so begins an epic love story that would forever change the course of American history.
