Two Generals' Problem. From Wikipedia, the free encyclopedia. Jump to navigation Jump to search. Thought experiment. Positions of the armies. Armies A1 and A2 need to communicate but their messengers may be captured by army B. In computing, the Two Generals' Problem is a thought experiment meant to illustrate the pitfalls and design challenges of attempting to coordinate an action by communicating over an unreliable link.

~~Two Generals' Problem - Wikipedia~~

In his (1980), Peter Unger introduced the “Problem of the Many”. A similar problem appeared simultaneously in P. T. Geach (1980), but Unger's presentation has been the most influential over recent years. The problem initially looks like a special kind of puzzle about vague predicates, but that may be misleading.

The General Problem Solver (GPS) was a theory of human problem solving stated in the form of a simulation program (Ernst & Newell, 1969; Newell & Simon, 1972). This program and the associated theoretical framework had a significant impact on the subsequent direction of cognitive psychology. It also introduced the use of productions as a method for specifying cognitive models.

A problem statement is a concise description of an issue to be addressed or a condition to be improved upon. It identifies the gap between the current (problem) state and desired (goal) state of a process or product. Focusing on the facts, the problem statement should be designed to address the Five Ws. The first condition of solving a problem is understanding the problem, which can be done by ...

Other articles where General elution problem is discussed: chromatography: Gas chromatography: This is termed the general elution problem. A simple solution is to increase the column temperature during the course of the separation. The well-resolved, highly volatile solutes are removed from the column at the lower temperatures before the low-volatility solutes leave the origin at the column inlet.

~~General elution problem | chemistry | Britannica~~

The restricted Burnside problem then asks whether $B_0(m, n)$ is a finite group. In the case of the prime exponent p , this problem was extensively studied by A. I. Kostrikin during the 1950s, prior to the negative solution of the general Burnside problem.
